1 [Reflections on NoteCards: seven issues for the next generation of hypermedia systems](#)

Frank, G. Halasz

July 1988 **Communications of the ACM**, Volume 31 Issue 7Full text available: ☒ pdf(2.26 MB)
 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

NoteCards, developed by a team at Xerox PARC, was designed to support the task of transforming a chaotic collection of unrelated thoughts into an integrated, orderly interpretation of ideas and their interconnections. This article presents NoteCards as a foil against which to explore some of the major limitations of the current generation of hypermedia systems, and characterizes the issues that must be addressed in designing the next generation systems.

2 [What's special about spatial?: database requirements for vehicle navigation in geographic space](#)

Max J. Egenhofer

June 1993 **ACM SIGMOD Record , Proceedings of the 1993 ACM SIGMOD international conference on Management of data**, Volume 22 Issue 2Full text available: ☒ pdf(584.34 KB)
 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Geographic databases are becoming a popular subject for research projects. It is acknowledged that database requirements for such applications as Geographic Information Systems (GISs), computer cartography, remote-sensing image databases, and emergency routing/dispatching are distinct from those for traditional database applications; however, the specific database needs due to the properties of geographic data are frequently overlooked. Here, we describe a specific problem domain, a

3 [Reflections on NoteCards: seven issues for the next generation of hypermedia systems](#)

Frank G. Halasz

November 1987 **Proceeding of the ACM conference on Hypertext**Full text available: ☒ pdf(1.94 MB)
 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

NoteCards is a general hypermedia environment designed to help people work with ideas. Its intended users are authors, designers, and other intellectual laborers engaged in analyzing information, designing artifacts, and generally processing ideas. The system provides these users with a variety of hypermedia-based tools for collecting, representing, managing, interrelating, and communicating ideas. This paper presents the NoteCards system as a foil against which to explore some o ...
